

Beautification report 10/20/2020

No meeting was done.

We will present to the board at the November meeting quotes to add sprinklers to entrada south side and tweak any landscaping that needs to be done. I will also talk to Jose about the tall weeds in the drainage canal.

Will also get quotes for ideas for SW corner of the 4 way entrance. Several committee members felt the 4 way was more important than Entrada if we had to only do 1 project.

Residents also mentioned a strangler vine is killing a sabal palm in Empress park, near bench and concern about black, moldy looking trunks of the Bismark palms in phase 5 and Bismark park. I think these would be maintenance items.
